

## Safety Data Sheet

# 7 Mix nitrobenzene in isooctane

Version : V2.0.0.1

Report No. : BWQ0281-2016-MSDS-EP

Creation Date : 2025/12/31

Revision Date : -

\*Prepared in accordance with EU REACH Regulation (REACH 1907/2006 with amendment 2020/878)

## 1 Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

|                           |                                 |
|---------------------------|---------------------------------|
| Product Name              | 7 Mix nitrobenzene in isooctane |
| Cat No.                   | BWQ0281-2016                    |
| CAS No.                   | Not applicable                  |
| EC No.                    | Not applicable                  |
| Molecular Formula         | Not applicable                  |
| REACH Registration Number | -                               |
| UFI                       | No information available        |

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|                          |                              |
|--------------------------|------------------------------|
| Relevant identified uses | Please consult manufacturer. |
| Uses advised against     | Please consult manufacturer. |

### 1.3 Details of the supplier of the Safety Data Sheet

|                        |                                                                                                      |
|------------------------|------------------------------------------------------------------------------------------------------|
| Name of the company    | Weiyel Inc                                                                                           |
| Address of the company | Hedian Light Industrial Park, Chengguan Town, Shangcheng County, Xinyang City, Henan Province, China |
| Post code              | 465350                                                                                               |
| Telephone number       | 010-58103678                                                                                         |
| Fax number             | 010-84840368                                                                                         |
| E-mail address         | info@weiyel.com                                                                                      |

### 1.4 Emergency telephone number

|                            |              |
|----------------------------|--------------|
| Emergency telephone number | 010-58103678 |
| Opening hours              | 24h          |

## 2 Hazards identification

### 2.1 CLP classification according to Regulation ( EC ) No. 1272/2008 with amendment 2023/707

|                                                                    |            |
|--------------------------------------------------------------------|------------|
| Flammable liquids                                                  | Category 2 |
| Aspiration hazard                                                  | Category 1 |
| Skin Corrosion/Irritation                                          | Category 2 |
| Specific target organ toxicity - single exposure; narcotic effects | Category 3 |

|                                                                   |             |
|-------------------------------------------------------------------|-------------|
| Germ cell mutagenicity                                            | Category 1B |
| Carcinogenicity                                                   | Category 1B |
| Hazardous to the aquatic environment - short-term (acute) hazard  | Category 1  |
| Hazardous to the aquatic environment - long-term (chronic) hazard | Category 1  |

## 2.2 Label elements

|                   |                                                                                                                                                                                                                                                                                                                                            |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hazard pictograms |     |
| Signal word       | <b>Danger</b>                                                                                                                                                                                                                                                                                                                              |

## Hazard statements

|      |                                                      |
|------|------------------------------------------------------|
| H225 | Highly flammable liquid and vapour                   |
| H304 | May be fatal if swallowed and enters airways         |
| H315 | Causes skin irritation                               |
| H336 | May cause drowsiness or dizziness                    |
| H340 | May cause genetic defects                            |
| H350 | May cause cancer                                     |
| H400 | Very toxic to aquatic life                           |
| H410 | Very toxic to aquatic life with long lasting effects |

## Precautionary statements

### ◆ Prevention

|      |                                                                                                |
|------|------------------------------------------------------------------------------------------------|
| P201 | Obtain special instructions before use.                                                        |
| P202 | Do not handle until all safety precautions have been read and understood.                      |
| P210 | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. |
| P233 | Keep container tightly closed.                                                                 |
| P240 | Ground and bond container and receiving equipment.                                             |
| P241 | Use explosion-proof [electrical/ventilating/lighting] equipment.                               |
| P242 | Use non-sparking tools.                                                                        |
| P243 | Take action to prevent static discharges.                                                      |
| P261 | Avoid breathing gas/mist/vapour/spray.                                                         |
| P264 | Wash hands and other parts of the body (if related) thoroughly after handling.                 |
| P271 | Use only outdoors or in a well-ventilated area.                                                |
| P273 | Avoid release to the environment.                                                              |
| P280 | Wear protective gloves/protective clothing/eye protection/face protection.                     |

### ◆ Response

|      |                                                             |
|------|-------------------------------------------------------------|
| P312 | Call a POISON CENTRE/ doctor/... if you feel unwell.        |
| P321 | Specific treatment (see related instructions on the label). |
| P331 | Do NOT induce vomiting.                                     |

|                       |                                                                                                                                                                                                                                                                                                                                                                               |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>P391</b>           | Collect spillage.                                                                                                                                                                                                                                                                                                                                                             |
| <b>P301+P310</b>      | IF SWALLOWED: Immediately call a POISON CENTER/doctor.                                                                                                                                                                                                                                                                                                                        |
| <b>P302+P352</b>      | IF ON SKIN: Wash with plenty of water.                                                                                                                                                                                                                                                                                                                                        |
| <b>P304+P340</b>      | IF INHALED: Remove person to fresh air and keep comfortable for breathing.                                                                                                                                                                                                                                                                                                    |
| <b>P308+P313</b>      | IF exposed or concerned: Get medical advice/attention.                                                                                                                                                                                                                                                                                                                        |
| <b>P332+P313</b>      | If skin irritation occurs: Get medical advice/attention.                                                                                                                                                                                                                                                                                                                      |
| <b>P362+P364</b>      | Take off contaminated clothing and wash it before reuse.                                                                                                                                                                                                                                                                                                                      |
| <b>P370+P378</b>      | Small fire: dry chemical, CO <sub>2</sub> or water spray; Large fire: water spray, fog or regular foam; Fire involving tanks, rail tank cars or highway tanks: Fight fire from maximum distance or use unmanned master stream devices or monitor nozzles. Cool containers with flooding quantities of water until well after fire is out. Do not get water inside containers. |
| <b>P303+P361+P353</b> | IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse affected areas with water [or shower].                                                                                                                                                                                                                                                            |

◆ Storage

|                  |                                                                  |
|------------------|------------------------------------------------------------------|
| <b>P405</b>      | Store locked up.                                                 |
| <b>P403+P233</b> | Store in a well-ventilated place. Keep container tightly closed. |
| <b>P403+P235</b> | Store in a well-ventilated place. Keep cool.                     |

◆ Disposal

|             |                                                                                                     |
|-------------|-----------------------------------------------------------------------------------------------------|
| <b>P501</b> | Dispose of contents/container in accordance with local/regional/national/international regulations. |
|-------------|-----------------------------------------------------------------------------------------------------|

## 2.3 Other hazards

◆ Results of PBT and vPvB assessment

| Component                      | Results of PBT and vPvB assessment [according to (EC) No 1907/2006] |
|--------------------------------|---------------------------------------------------------------------|
| <b>2,2,4-Trimethylpentane</b>  | Not PBT/vPvB                                                        |
| <b>Nitrobenzene</b>            | Insufficient information, temporarily unable to evaluate            |
| <b>4-nitrotoluene</b>          | Insufficient information, temporarily unable to evaluate            |

## 4 First-aid measures

### 4.1 Description of first aid measures

|                                   |                                                                                                                                                |
|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General advice</b>             | Immediate medical attention is required. Show this safety data sheet (SDS) to the doctor in attendance.                                        |
| <b>Eye contact</b>                | First rinse with plenty of water for several minutes (remove contact lenses if easily possible), then take to a doctor.                        |
| <b>Skin contact</b>               | Remove contaminated clothes. Rinse and then wash skin with water and soap.                                                                     |
| <b>Ingestion</b>                  | Rinse mouth. Do NOT induce vomiting. Refer for medical attention.                                                                              |
| <b>Inhalation</b>                 | Fresh air, rest. Artificial respiration may be needed. Refer for medical attention.                                                            |
| <b>Protecting of first-aiders</b> | Ensure that medical personnel are aware of the substance involved. Take precautions to protect themselves and prevent spread of contamination. |

### 4.2 Most important symptoms/effects, acute and delayed

|   |                                                                                                                                        |
|---|----------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Substance accumulation, in the human body, may occur and may cause some concern following repeated or long-term occupational exposure. |
|---|----------------------------------------------------------------------------------------------------------------------------------------|

### 4.3 Indication of any immediate medical attention and special treatment needed

|   |                          |
|---|--------------------------|
| 1 | Treat symptomatically.   |
| 2 | Symptoms may be delayed. |

## 5 Fire-fighting measures

### 5.1 Extinguishing media

|                                       |                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Small fire: dry chemical, CO <sub>2</sub> or water spray; Large fire: water spray, fog or regular foam; Fire involving tanks, rail tank cars or highway tanks: Fight fire from maximum distance or use unmanned master stream devices or monitor nozzles. Cool containers with flooding quantities of water until well after fire is out. Do not get water inside containers. |
| <b>Unsuitable extinguishing media</b> | Large fire: avoid aiming straight or solid streams directly onto the product.                                                                                                                                                                                                                                                                                                 |

### 5.2 Specific hazards arising from the substance or mixture

|   |                                                                                   |
|---|-----------------------------------------------------------------------------------|
| 1 | May emit poisonous fumes on fire.                                                 |
| 2 | Development of hazardous combustion gases or vapor possible in the event of fire. |

|   |                                                                         |
|---|-------------------------------------------------------------------------|
| 3 | May expansion or decompose explosively when heated or involved in fire. |
|---|-------------------------------------------------------------------------|

### 5.3 Advice for firefighters

|   |                                                                                                                        |
|---|------------------------------------------------------------------------------------------------------------------------|
| 1 | As in any fire, wear self-contained breathing apparatus ( MSHA/NIOSH approved or equivalent) and full protective gear. |
| 2 | Fight fire from a safe distance, with adequate cover.                                                                  |
| 3 | Prevent fire extinguishing water from contaminating surface water or the ground water system.                          |

## 6 Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

|   |                                                                                                                     |
|---|---------------------------------------------------------------------------------------------------------------------|
| 1 | Fully encapsulating, vapor protective clothing should be worn for spills and leaks with no fire.                    |
| 2 | Do not touch or walk through spilled material.                                                                      |
| 3 | Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.                 |
| 4 | Use personal protective equipment, do not breathe gas/mist/vapour/spray.                                            |
| 5 | Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges. |
| 6 | Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.                                   |

### 6.2 Environmental precautions

|   |                                                       |
|---|-------------------------------------------------------|
| 1 | Prevent further leakage or spillage if safe to do so. |
| 2 | Discharge into the environment must be avoided.       |

### 6.3 Methods and materials for containment and cleaning up

|    |                                                                                                                                 |
|----|---------------------------------------------------------------------------------------------------------------------------------|
| 1  | Do not touch or cross spills.                                                                                                   |
| 2  | Cover with anti-solvent foam to reduce evaporation.                                                                             |
| 3  | It is recommended that emergency personnel wear positive pressure self-contained breathing apparatus and wear anti-virus suits. |
| 4  | Spray water disperses the vapor and dilutes the liquid spill.                                                                   |
| 5  | Do not touch broken containers and spills before putting on appropriate protective clothing.                                    |
| 6  | Cut off the source of the leak as much as possible.                                                                             |
| 7  | Keep leaks in a ventilated place.                                                                                               |
| 8  | Absorb spilled material in dry sand or inert absorbent. In case of large amount of spillage, contain a spill by bunding.        |
| 9  | Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.                                            |
| 10 | Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container.     |

### 6.4 Reference to other sections

|   |                                                                            |
|---|----------------------------------------------------------------------------|
| 1 | Personal Protective Equipment advice is contained in Section 8 of the SDS. |
| 2 | Disposal considerations advice is contained in Section 13 of the SDS.      |

## 7 Handling and storage

### 7.1 Precautions for safe handling

#### ◆ Protective measures

|   |                                                   |
|---|---------------------------------------------------|
| 1 | Handling is performed in a well ventilated place. |
| 2 | Wear suitable protective equipment.               |
| 3 | Avoid contact with skin and eyes.                 |

◆ Measures to prevent fire

1 Keep away from heat/sparks/open flames/ hot surfaces.

◆ Measures to prevent aerosol and dust generation

1 Not applicable.

◆ Advice on general occupational hygiene

1 Wash hands and face after using the substances.

2 Replace the contaminated clothing immediately.

## 7.2 Conditions for safe storage, including any incompatibilities

1 Keep containers tightly closed.

2 Keep containers in a dry, cool and well-ventilated place.

3 Keep away from heat/sparks/open flames/hot surfaces.

4 Store away from incompatible materials and foodstuff containers.

## 7.3 Specific end use(s)

1 In addition to use mentioned in the Section 1.2, unforeseen other specific end uses.

# 8 Exposure controls/personal protection

## 8.1 Control parameters

◆ Occupational exposure limit values

| Component              | Country/Region                                              | Limit value - Eight hours |                   | Limit value - Short term |                   |
|------------------------|-------------------------------------------------------------|---------------------------|-------------------|--------------------------|-------------------|

◆ Predicted No Effect Concentration (PNEC)

| Component                     | A                 | B                 | C                 | D                 | E                 | F                    | G                 | H                                |
|-------------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|----------------------|-------------------|----------------------------------|
| <b>2,2,4-Trimethylpentane</b> | No data available | No data available | No data available | No data available | No data available | No hazard identified | No data available | No potential for bioaccumulation |

**Note 1:**

A: Freshwater; B: Seawater; C: Sewage treatment plant; D: Sediment (freshwater); E: Sediment (seawater); F: Air; G: Soil; H: Secondary poisoning(Hazard for Predators).

**Note 2:**

The PNEC values of the remaining components not shown in the product are not available yet.

## 8.2 Exposure controls

### 8.2.1 Engineering controls

|   |                                                                                        |
|---|----------------------------------------------------------------------------------------|
| 1 | Ensure adequate ventilation, especially in confined areas.                             |
| 2 | Ensure that eyewash stations and safety showers are close to the workstation location. |
| 3 | Use explosion-proof electrical/ventilating/lighting/equipment.                         |
| 4 | Set up emergency exit and necessary risk-elimination area.                             |

### 8.2.2 Personal protection equipment

| General requirement      |      |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye protection           | Must wear appropriate safety goggles.                                                                                                                                                                                                                                                                                                                                                                                        |
| Hand protection          | Must wear anti static chemical protective gloves.                                                                                                                                                                                                                                                                                                                                                                            |
| Respiratory protection   | Must wear appropriate personal respiratory protective equipment.                                                                                                                                                                                                                                                                                                                                                             |
| Skin and body protection | Must wear anti static chemical protective clothing and anti static shoes.                                                                                                                                                                                                                                                                                                                                                    |

### 8.2.3 Environmental exposure controls

|                                 |                          |
|---------------------------------|--------------------------|
| Environmental exposure controls | No information available |
|---------------------------------|--------------------------|

## 9 Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

|                                             |                                                                                            |
|---------------------------------------------|--------------------------------------------------------------------------------------------|
| Physical state                              | clear or yellow liquid                                                                     |
| Colour                                      | clear or yellow liquid                                                                     |
| Odor                                        | No information available                                                                   |
| Odor threshold                              | No information available                                                                   |
| pH                                          | No information available                                                                   |
| Melting point/freezing point(°C)            | -107 ( 2,2,4-Trimethylpentane )                                                            |
| Initial boiling point and boiling range(°C) | 99 ( 2,2,4-Trimethylpentane )                                                              |
| Flash point(Closed cup,°C)                  | -12 ( 2,2,4-Trimethylpentane )                                                             |
| Evaporation rate                            | No information available                                                                   |
| Flammability                                | No information available                                                                   |
| Upper/lower explosive limits[% (v/v)]       | Upper limit : 6.0 ( 2,2,4-Trimethylpentane ); Lower limit : 1.1 ( 2,2,4-Trimethylpentane ) |
| Vapor pressure                              | 5.1kPa ( 20°C, 2,2,4-Trimethylpentane )                                                    |
| Vapor density(Air = 1)                      | 3.9 ( 2,2,4-Trimethylpentane )                                                             |
| Relative density(Water=1)                   | 0.69 ( 2,2,4-Trimethylpentane )                                                            |
| Solubility                                  | Insoluble in water ( 2,2,4-Trimethylpentane )                                              |
| n-octanol/water partition coefficient       | 4.08 ( 2,2,4-Trimethylpentane )                                                            |
| Auto-ignition temperature(°C)               | 417 ( 2,2,4-Trimethylpentane )                                                             |
| Decomposition temperature(°C)               | No information available                                                                   |
| Kinematic viscosity                         | No information available                                                                   |
| Explosive properties                        | No information available                                                                   |
| Oxidizing properties                        | No information available                                                                   |
| Particle characteristics                    | Not applicable                                                                             |

## 9.2 Other information

### 9.2.1 Information with regard to physical hazard classes

|                                                    |                          |
|----------------------------------------------------|--------------------------|
| Information with regard to physical hazard classes | No information available |
|----------------------------------------------------|--------------------------|

### 9.2.2 Other safety characteristics

|                              |                          |
|------------------------------|--------------------------|
| Other safety characteristics | No information available |
|------------------------------|--------------------------|

## 10 Stability and reactivity

### Stability and reactivity

|                                         |                                                                                                                                                                                                               |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.1 Reactivity                         | Contact with incompatible substances can cause decomposition or other chemical reactions.                                                                                                                     |
| 10.2 Chemical stability                 | Stable under proper operation and storage conditions.                                                                                                                                                         |
| 10.3 Possibility of hazardous reactions | In contact with an open flame may cause a fire or explosion. In contact with ammonia, strong inorganic alkalis, active metals, alkali carbonates, metal oxides or metal alkoxides may result in an explosion. |
| 10.4 Conditions to avoid                | Incompatible materials, heat, flame and spark.                                                                                                                                                                |
| 10.5 Incompatible materials             | Oxidants and halogen. Ammonia, strong inorganic alkalis, active metal, alkali metal carbonates, metal oxides, metal alkoxides, and nitric acid.                                                               |
| 10.6 Hazardous decomposition products   | Under normal conditions of storage and use, hazardous decomposition products should not be produced.                                                                                                          |

## 11 Toxicological information

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008 with amendment 2023/707

| 7 Mix nitrobenzene in isooctane |                                                                  |
|---------------------------------|------------------------------------------------------------------|
| Skin corrosion/irritation       | Causes skin irritation(Category 2)                               |
| Serious eye damage/irritation   | Based on available data, the classification criteria are not met |
| Skin sensitization              | Based on available data, the classification criteria are not met |
| Respiratory sensitization       | Based on available data, the classification criteria are not met |
| Reproductive toxicity           | Based on available data, the classification criteria are not met |
| STOT-single exposure            | May cause drowsiness or dizziness(Category 3)                    |
| STOT-repeated exposure          | Based on available data, the classification criteria are not met |
| Aspiration hazard               | May be fatal if swallowed and enters airways(Category 1)         |
| Germ cell mutagenicity          | May cause genetic defects(Category 1B)                           |

### Acute toxicity

| Component               | LD <sub>50</sub> (oral) | LD <sub>50</sub> (dermal) | LC <sub>50</sub> (inhalation,4h) |
|-------------------------|-------------------------|---------------------------|----------------------------------|
| 4-nitrotoluene          | 1960mg/kg(Rat)          | > 16000mg/kg(Rat)         | No information available         |
| Nitrobenzene            | 349mg/kg(Rat)           | 760mg/kg(Rabbit)          | 556ppmV(Rat)                     |
| 1-chloro-4-nitrobenzene | 420mg/kg(Rat)           | 3040mg/kg(Rabbit)         | No information available         |
| 1-chloro-2-nitrobenzene | 268mg/kg(Rat)           | 400mg/kg(Rabbit)          | No information available         |
| 3-nitrotoluene          | 1072mg/kg(Rat)          | No information available  | No information available         |
| 1-chloro-3-nitrobenzene | 420mg/kg(Rat)           | 890mg/kg(Rat)             | 3.2mg/L(Rat)                     |
| 2-nitrotoluene          | 891mg/kg(Rat)           | No information available  | No information available         |

## Carcinogenicity

| Component               | List of carcinogens by the IARC Monographs | Report on Carcinogens by NTP |
|-------------------------|--------------------------------------------|------------------------------|
| 2,2,4-Trimethylpentane  | Not Listed                                 | Not Listed                   |
| Nitrobenzene            | Category 2B                                | Category R                   |
| 4-nitrotoluene          | Category 3                                 | Not Listed                   |
| 3-nitrotoluene          | Category 3                                 | Not Listed                   |
| 2-nitrotoluene          | Category 2A(Remark 1)                      | Category R                   |
| 1-chloro-4-nitrobenzene | Category 2B                                | Not Listed                   |
| 1-chloro-3-nitrobenzene | Category 2B(Remark 2)                      | Not Listed                   |
| 1-chloro-2-nitrobenzene | Category 2B                                | Not Listed                   |

Remark 1: Overall evaluation upgraded to Group 2A with supporting evidence from other relevant data; Remark 2: see 2-Chloronitrobenzene

## 11.2 Information on other hazards

### 11.2.1 Endocrine disrupting properties

| Component               | Endocrine disrupting properties |
|-------------------------|---------------------------------|
| 2,2,4-Trimethylpentane  | No information available        |
| Nitrobenzene            | No information available        |
| 4-nitrotoluene          | No information available        |
| 3-nitrotoluene          | No information available        |
| 2-nitrotoluene          | No information available        |
| 1-chloro-4-nitrobenzene | No information available        |
| 1-chloro-3-nitrobenzene | No information available        |
| 1-chloro-2-nitrobenzene | No information available        |

### 11.2.2 Other Information

|                   |                  |
|-------------------|------------------|
| Other Information | See Section 11.1 |
|-------------------|------------------|

## 12 Ecological information

### 12.1 Toxicity

#### Acute aquatic toxicity

| Component               | Fish                                    | Crustaceans                                   | Algae or other aquatic plants             |
|-------------------------|-----------------------------------------|-----------------------------------------------|-------------------------------------------|
| 4-nitrotoluene          | LC <sub>50</sub> : 37mg/L (96h)(Fish)   | EC <sub>50</sub> : 9.8mg/L (48h)(Crustaceans) | ErC <sub>50</sub> : 10mg/L (72h)(Algae)   |
| Nitrobenzene            | LC <sub>50</sub> : 92mg/L (96h)(Fish)   | EC <sub>50</sub> : 35mg/L (48h)(Crustaceans)  | ErC <sub>50</sub> : 23.8mg/L (96h)(Algae) |
| 1-chloro-4-nitrobenzene | LC <sub>50</sub> : 14.4mg/L (96h)(Fish) | EC <sub>50</sub> : 2.7mg/L (48h)(Crustaceans) | ErC <sub>50</sub> : 4.9mg/L (96h)(Algae)  |
| 1-chloro-2-nitrobenzene | LC <sub>50</sub> : 34.6mg/L             | EC <sub>50</sub> : 3.2mg/L                    | ErC <sub>50</sub> : 6.9mg/L               |

|                                | (96h)(Fish)                             | (48h)(Crustaceans)                             | (96h)(Algae)                             |
|--------------------------------|-----------------------------------------|------------------------------------------------|------------------------------------------|
| <b>3-nitrotoluene</b>          | LC <sub>50</sub> : 30mg/L (96h)(Fish)   | EC <sub>50</sub> : 7.4mg/L (48h)(Crustaceans)  | ErC <sub>50</sub> : 14mg/L (96h)(Algae)  |
| <b>1-chloro-3-nitrobenzene</b> | LC <sub>50</sub> : 18.8mg/L (96h)(Fish) | EC <sub>50</sub> : 15.1mg/L (48h)(Crustaceans) | ErC <sub>50</sub> : 1.9mg/L (96h)(Algae) |
| <b>2-nitrotoluene</b>          | LC <sub>50</sub> : 37.1mg/L (96h)(Fish) | EC <sub>50</sub> : 5.4mg/L (48h)(Crustaceans)  | ErC <sub>50</sub> : 22mg/L (72h)(Algae)  |

### Chronic aquatic toxicity

| Component                      | Fish                   | Crustaceans                 | Algae or other aquatic plants |
|--------------------------------|------------------------|-----------------------------|-------------------------------|
| <b>4-nitrotoluene</b>          | NOEC : 0.8mg/L(Fish)   | NOEC : 2.0mg/L(Crustaceans) | NOEC : 1.9mg/L(Algae)         |
| <b>1-chloro-2-nitrobenzene</b> | NOEC : 0.534mg/L(Fish) | No information available    | No information available      |
| <b>3-nitrotoluene</b>          | NOEC : 2mg/L(Fish)     | No information available    | No information available      |
| <b>2-nitrotoluene</b>          | NOEC : 1.9mg/L(Fish)   | No information available    | No information available      |

### 12.2 Persistence and degradability

| Component                      | Persistence (water/soil) | Persistence (air) |
|--------------------------------|--------------------------|-------------------|
| <b>2,2,4-Trimethylpentane</b>  | High                     | High              |
| <b>4-nitrotoluene</b>          | High                     | High              |
| <b>3-nitrotoluene</b>          | High                     | High              |
| <b>2-nitrotoluene</b>          | High                     | High              |
| <b>1-chloro-4-nitrobenzene</b> | High                     | High              |
| <b>1-chloro-3-nitrobenzene</b> | High                     | High              |
| <b>1-chloro-2-nitrobenzene</b> | High                     | High              |

### 12.3 Bioaccumulative potential

| Component                      | Bioaccumulative potential | Comments     |
|--------------------------------|---------------------------|--------------|
| <b>2,2,4-Trimethylpentane</b>  | Medium                    | BCF=650      |
| <b>4-nitrotoluene</b>          | Low                       | BCF=7.2      |
| <b>3-nitrotoluene</b>          | Low                       | BCF=12       |
| <b>2-nitrotoluene</b>          | Low                       | BCF=29.9     |
| <b>1-chloro-4-nitrobenzene</b> | Low                       | BCF=20.9     |
| <b>1-chloro-3-nitrobenzene</b> | Low                       | Log Kow=2.46 |
| <b>1-chloro-2-nitrobenzene</b> | Low                       | BCF=22.3     |

### 12.4 Mobility in soil

| Component                     | log Koc      | Remark         |
|-------------------------------|--------------|----------------|
| <b>2,2,4-Trimethylpentane</b> | ≥2.7 - ≤3.56 | 20 °C , pH=7.0 |
| <b>Nitrobenzene</b>           | 2.07         |                |

|                         |       |       |
|-------------------------|-------|-------|
| 4-nitrotoluene          | 2.490 |       |
| 3-nitrotoluene          | 2.49  |       |
| 2-nitrotoluene          | 2.32  | 20 °C |
| 1-chloro-4-nitrobenzene | 2.490 |       |
| 1-chloro-3-nitrobenzene | 2.56  | 20 °C |
| 1-chloro-2-nitrobenzene | 2.46  | 25 °C |

## 12.5 Results of PBT and vPvB assessment

| Component               | Results of PBT and vPvB assessment [according to (EC) No 1907/2006] |
|-------------------------|---------------------------------------------------------------------|
| 2,2,4-Trimethylpentane  | Not PBT/vPvB                                                        |
| Nitrobenzene            | Insufficient information, temporarily unable to evaluate            |
| 4-nitrotoluene          | Insufficient information, temporarily unable to evaluate            |
| 3-nitrotoluene          | Insufficient information, temporarily unable to evaluate            |
| 2-nitrotoluene          | Insufficient information, temporarily unable to evaluate            |
| 1-chloro-4-nitrobenzene | Insufficient information, temporarily unable to evaluate            |
| 1-chloro-3-nitrobenzene | Insufficient information, temporarily unable to evaluate            |
| 1-chloro-2-nitrobenzene | Insufficient information, temporarily unable to evaluate            |

## 12.6 Endocrine disrupting properties

| Component               | Endocrine disrupting properties |
|-------------------------|---------------------------------|
| 2,2,4-Trimethylpentane  | No information available        |
| Nitrobenzene            | No information available        |
| 4-nitrotoluene          | No information available        |
| 3-nitrotoluene          | No information available        |
| 2-nitrotoluene          | No information available        |
| 1-chloro-4-nitrobenzene | No information available        |
| 1-chloro-3-nitrobenzene | No information available        |
| 1-chloro-2-nitrobenzene | No information available        |

## 12.7 Other adverse effects

|  |                          |
|--|--------------------------|
|  | No information available |
|--|--------------------------|

# 13 Disposal considerations

## 13.1 Waste treatment methods

|                          |                                                                                                                                                        |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste chemicals          | Before disposal should refer to the relevant national and local laws and regulation. Recommend the use of incineration disposal.                       |
| Contaminated packaging   | Containers may still present chemical hazard when empty. Keep away from hot and ignition source of fire. Return to supplier for recycling if possible. |
| Disposal recommendations | Refer to section waste chemicals and contaminated packaging.                                                                                           |

# 14 Transport information

**Label and Mark**

|                    |                                                                                   |
|--------------------|-----------------------------------------------------------------------------------|
| Transporting Label |  |
|--------------------|-----------------------------------------------------------------------------------|

**IMDG-CODE**

|                                        |                            |
|----------------------------------------|----------------------------|
| 14.1 UN number                         | 1578                       |
| 14.2 UN proper shipping name           | CHLORONITROBENZENES, SOLID |
| 14.3 Transport hazard class            | 6.1                        |
| 14.4 Packing group                     | II                         |
| 14.5 Environmental hazards (Yes or no) | Yes                        |

**IATA-DGR**

|                                        |                            |
|----------------------------------------|----------------------------|
| 14.1 UN number                         | 1578                       |
| 14.2 UN proper shipping name           | CHLORONITROBENZENES, SOLID |
| 14.3 Transport hazard class            | 6.1                        |
| 14.4 Packing group                     | II                         |
| 14.5 Environmental hazards (Yes or no) | Yes                        |

**UN-ADR**

|                                        |                            |
|----------------------------------------|----------------------------|
| 14.1 UN number                         | 1578                       |
| 14.2 UN proper shipping name           | CHLORONITROBENZENES, SOLID |
| 14.3 Transport hazard class            | 6.1                        |
| 14.4 Packing group                     | II                         |
| 14.5 Environmental hazards (Yes or no) | Yes                        |

**Special precautions for user**

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | Transit should be anti-exposure, rain, high temperature. Strictly prohibited shipping or transportation with acids, alkalis, oxidants, food and food additives etc. Transport vehicles should be equipped with the appropriate variety and quantity of fire equipment and emergency equipment leakage during transport. Before transport, should be preceded by checking whether container integrity, sealing. The transport unit must be placarded and marked in accordance with relevant transporting requirements. |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Maritime transport in bulk according to IMO instruments**

|                                                                          |               |
|--------------------------------------------------------------------------|---------------|
| ◆ Transport in bulk according to Annex II of MARPOL and the IBC code     |               |
|                                                                          | Not Available |
| ◆ Transport in bulk in accordance with MARPOL Annex V and the IMSBC Code |               |
|                                                                          | Not Available |
| ◆ Transport in bulk in accordance with the IGC Code                      |               |
|                                                                          | Not Available |

### German water hazard class(WGK)

| Component                      | WGK   | Remark |
|--------------------------------|-------|--------|
| <b>2,2,4-Trimethylpentane</b>  | WGK 2 |        |
| <b>Nitrobenzene</b>            | WGK 3 |        |
| <b>4-nitrotoluene</b>          | WGK 3 |        |
| <b>3-nitrotoluene</b>          | WGK 3 |        |
| <b>2-nitrotoluene</b>          | WGK 3 |        |
| <b>1-chloro-4-nitrobenzene</b> | WGK 3 |        |
| <b>1-chloro-3-nitrobenzene</b> | WGK 3 |        |
| <b>1-chloro-2-nitrobenzene</b> | WGK 3 |        |

- 【WGK 1】 slightly hazardous to water  
 【WGK 2】 obviously hazardous to water  
 【WGK 3】 highly hazardous to water  
 【nwg】 non-hazardous to water  
 【awg】 hazardous to water in general

### German technical instructions on air quality control(TA LUFT)

| Component                     | TA LUFT                                                                                                                                                                                                                                                                                                                                               | Remark |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| <b>2,2,4-Trimethylpentane</b> | Chapter 5.2.5 Organic Substances. The following values, specified as overall carbon, are in all not allowed to be exceeded in exhaust gas: Mass flow: 0,50 kg/hr or Mass conc.: 50 mg/m <sup>3</sup> At old units with an annual mass flow till 1,5 Mg/a, specified as total carbon, the emissions in exhaust gas are not allowed to exceed 1,5 kg/h. |        |

|                                |                                                                                                                                                                                                                                                                                                                                                                                        |  |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <b>Nitrobenzene</b>            | Chapter 5.2.7.1.3 Substances toxic to reproduction<br>Mass flow: 2,5 g/hr or<br>Mass conc.: 1 mg/m <sup>3</sup>                                                                                                                                                                                                                                                                        |  |
| <b>4-nitrotoluene</b>          | Chapter 5.2.5 Organic Substances, class I. The following values are in all not allowed to be exceeded in the exhaust gas:<br>Mass flow: 0,10 kg/hr or<br>Mass conc.: 20 mg/m <sup>3</sup>                                                                                                                                                                                              |  |
| <b>3-nitrotoluene</b>          | Chapter 5.2.5 Organic Substances. The following values, specified as overall carbon, are in all not allowed to be exceeded in exhaust gas:<br>Mass flow: 0,50 kg/hr or<br>Mass conc.: 50 mg/m <sup>3</sup><br>At old units with an annual mass flow till 1,5 Mg/a, specified as total carbon, the emissions in exhaust gas are not allowed to exceed 1,5 kg/h.                         |  |
| <b>2-nitrotoluene</b>          | Chapter 5.2.7.1.1 Carcinogenic Substances<br>The substance must be assigned to the class (I, II or III) whose substances have the nearest potency. We can not accomplish this evaluation due to insufficiency of data.<br>Carcinogenic substances not mentioned by name and for which no information on potency is available should be assigned to Class I as a precautionary measure. |  |
| <b>1-chloro-4-nitrobenzene</b> | Chapter 5.2.5 Organic Substances, class I. The following values are in all not allowed to be exceeded in the exhaust gas:<br>Mass flow: 0,10 kg/hr or<br>Mass conc.: 20 mg/m <sup>3</sup>                                                                                                                                                                                              |  |
| <b>1-chloro-3-nitrobenzene</b> | Chapter 5.2.5 Organic Substances, class I. The following values are in all not allowed to be exceeded in the exhaust gas:<br>Mass flow: 0,10 kg/hr or<br>Mass conc.: 20 mg/m <sup>3</sup>                                                                                                                                                                                              |  |
| <b>1-chloro-2-nitrobenzene</b> | Chapter 5.2.5 Organic Substances, class I. The following values are in all not allowed to be exceeded in the exhaust gas:<br>Mass flow: 0,10 kg/hr or<br>Mass conc.: 20 mg/m <sup>3</sup>                                                                                                                                                                                              |  |
