

## Safety Data Sheet

# Methylhydrazine in water

Version : V2.0.0.1

Report No. : BWZ7410-2016-MSDS-EP

Creation Date : 2025/12/27

Revision Date : -

\*Prepared in accordance with EU REACH Regulation (REACH 1907/2006 with amendment 2020/878)

## 1 Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

|                           |                          |
|---------------------------|--------------------------|
| Product Name              | Methylhydrazine in water |
| Cat No.                   | BWZ7410-2016             |
| CAS No.                   | Not applicable           |
| EC No.                    | Not applicable           |
| Molecular Formula         | Not applicable           |
| REACH Registration Number | -                        |
| UFI                       | No information available |

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|                          |                              |
|--------------------------|------------------------------|
| Relevant identified uses | Please consult manufacturer. |
| Uses advised against     | Please consult manufacturer. |

### 1.3 Details of the supplier of the Safety Data Sheet

|                        |                                                                                                      |
|------------------------|------------------------------------------------------------------------------------------------------|
| Name of the company    | Weiyel Inc                                                                                           |
| Address of the company | Hedian Light Industrial Park, Chengguan Town, Shangcheng County, Xinyang City, Henan Province, China |
| Post code              | 465350                                                                                               |
| Telephone number       | 010-58103678                                                                                         |
| Fax number             | 010-84840368                                                                                         |
| E-mail address         | info@weiyel.com                                                                                      |

### 1.4 Emergency telephone number

|                            |              |
|----------------------------|--------------|
| Emergency telephone number | 010-58103678 |
| Opening hours              | 24h          |

## 2 Hazards identification

### 2.1 CLP classification according to Regulation ( EC ) No. 1272/2008 with amendment 2023/707

|                               |            |
|-------------------------------|------------|
| Flammable liquids             | Category 2 |
| Skin corrosion/irritation     | Category 1 |
| Serious eye damage/irritation | Category 1 |

### 2.2 Label elements

|                   |                                                                                                                                                                     |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hazard pictograms |   |
| Signal word       | <b>Danger</b>                                                                                                                                                       |

### Hazard statements

|      |                                         |
|------|-----------------------------------------|
| H225 | Highly flammable liquid and vapour      |
| H314 | Causes severe skin burns and eye damage |
| H318 | Causes serious eye damage               |

### Precautionary statements

#### ◆ Prevention

|      |                                                                                                |
|------|------------------------------------------------------------------------------------------------|
| P210 | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. |
| P233 | Keep container tightly closed.                                                                 |
| P240 | Ground and bond container and receiving equipment.                                             |
| P241 | Use explosion-proof [electrical/ventilating/lighting] equipment.                               |
| P242 | Use non-sparking tools.                                                                        |
| P243 | Take action to prevent static discharges.                                                      |
| P260 | Do not breathe gas/mist/vapour/spray.                                                          |
| P264 | Wash hands and other parts of the body (if related) thoroughly after handling.                 |
| P280 | Wear protective gloves/protective clothing/eye protection/face protection.                     |

#### ◆ Response

|                |                                                                                                                                                                                                                                                                                                                                             |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P310           | Immediately call a POISON CENTER/doctor.                                                                                                                                                                                                                                                                                                    |
| P321           | Specific treatment (see related instructions on the label).                                                                                                                                                                                                                                                                                 |
| P363           | Wash contaminated clothing before reuse.                                                                                                                                                                                                                                                                                                    |
| P304+P340      | IF INHALED: Remove person to fresh air and keep comfortable for breathing.                                                                                                                                                                                                                                                                  |
| P370+P378      | Small fire: dry chemical, CO <sub>2</sub> , water spray or alcohol-resistant foam; Large fire: water spray, fog or alcohol-resistant foam; Fire involving tanks: Fight fire from maximum distance or use unmanned master stream devices or monitor nozzles. Cool containers with flooding quantities of water until well after fire is out. |
| P301+P330+P331 | IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.                                                                                                                                                                                                                                                                                          |
| P303+P361+P353 | IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse affected areas with water [or shower].                                                                                                                                                                                                                          |
| P305+P351+P338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.                                                                                                                                                                                                            |

#### ◆ Storage

|           |                                              |
|-----------|----------------------------------------------|
| P405      | Store locked up.                             |
| P403+P235 | Store in a well-ventilated place. Keep cool. |

#### ◆ Disposal

|      |                                                                                                     |
|------|-----------------------------------------------------------------------------------------------------|
| P501 | Dispose of contents/container in accordance with local/regional/national/international regulations. |
|------|-----------------------------------------------------------------------------------------------------|

### 2.3 Other hazards

#### ◆ Results of PBT and vPvB assessment

| Component       | Results of PBT and vPvB assessment [according to (EC) No 1907/2006] |
|-----------------|---------------------------------------------------------------------|
| Water           | Insufficient information, temporarily unable to evaluate            |
| Sulphuric acid  | Not PBT/vPvB                                                        |
| Methylhydrazine | Not PBT/vPvB                                                        |

◆ Results of endocrine disrupting properties assessment

| Component       | Results of endocrine disrupting properties assessment [according to (EU) No 2017/2100 or (EU) No 2018/605] |
|-----------------|------------------------------------------------------------------------------------------------------------|
| Water           | Insufficient information, temporarily unable to evaluate                                                   |
| Sulphuric acid  | Insufficient information, temporarily unable to evaluate                                                   |
| Methylhydrazine | Insufficient information, temporarily unable to evaluate                                                   |

◆ Other

|  |                 |
|--|-----------------|
|  | Not applicable. |
|--|-----------------|

#### 3.1 Substance

|  |                |
|--|----------------|
|  | Not applicable |
|--|----------------|

#### 3.2 Mixture

| Component                                                                              | Weight % content(or range) | Classification according to Regulation ( EC ) No. 1272/2008 with amendment 2023/707 [CLP] | Specific Conc. Limits, M-factors                  |
|----------------------------------------------------------------------------------------|----------------------------|-------------------------------------------------------------------------------------------|---------------------------------------------------|
| <b>Water</b><br>CAS : 7732-18-5<br>EC : 231-791-2<br>Index No. : -                     | 99.5                       | Not Classified                                                                            | -                                                 |
| <b>Sulphuric acid</b><br>CAS : 7664-93-9<br>EC : 231-639-5<br>Index No. : 016-020-00-8 | 0.49                       | Skin corrosion/irritation, Category 1A, H314                                              | H314A:C ≥ 15% H315:5% ≤ C < 15% H319:5% ≤ C < 15% |
| <b>Methylhydrazine</b><br>CAS : 60-34-4<br>EC : 200-471-4<br>Index No. : 612-292-00-2  | 0.01                       | Carcinogenicity, Category 1B, H350                                                        | -                                                 |

### 4 First-aid measures

#### 4.1 Description of first aid measures

|                       |                                                                                                                                                                                                                                             |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General advice</b> | Immediate medical attention is required. Show this safety data sheet (SDS) to the doctor in attendance.                                                                                                                                     |
| <b>Eye contact</b>    | Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician if feel uncomfortable.                                                                                                                                |
| <b>Skin contact</b>   | Take off contaminated clothing and shoes immediately. Wash off with plenty of soap and water for at least 15 minutes and consult a physician if feel uncomfortable.                                                                         |
| <b>Ingestion</b>      | Never give anything by mouth to an unconscious person. Call a physician or Poison Control Center immediately.                                                                                                                               |
| <b>Inhalation</b>     | Move victim into fresh air. If breathing is difficult, give oxygen. Do not use mouth to mouth resuscitation if victim ingested or inhaled the substance. If not breathing, give artificial respiration and consult a physician immediately. |

|                                   |                                                                                                                                                |
|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Protecting of first-aiders</b> | Ensure that medical personnel are aware of the substance involved. Take precautions to protect themselves and prevent spread of contamination. |
|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|

## 4.2 Most important symptoms/effects, acute and delayed

|   |                                                                                                                                        |
|---|----------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Substance accumulation, in the human body, may occur and may cause some concern following repeated or long-term occupational exposure. |
|---|----------------------------------------------------------------------------------------------------------------------------------------|

## 4.3 Indication of any immediate medical attention and special treatment needed

|   |                          |
|---|--------------------------|
| 1 | Treat symptomatically.   |
| 2 | Symptoms may be delayed. |

## 5 Fire-fighting measures

### 5.1 Extinguishing media

|                                       |                                                                                                                                                                                                                                                                                                                                             |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Small fire: dry chemical, CO <sub>2</sub> , water spray or alcohol-resistant foam; Large fire: water spray, fog or alcohol-resistant foam; Fire involving tanks: Fight fire from maximum distance or use unmanned master stream devices or monitor nozzles. Cool containers with flooding quantities of water until well after fire is out. |
| <b>Unsuitable extinguishing media</b> | No information available.                                                                                                                                                                                                                                                                                                                   |

### 5.2 Specific hazards arising from the substance or mixture

|   |                                                                                                                                         |
|---|-----------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Will form explosive mixtures with air.                                                                                                  |
| 2 | Fire exposed containers may vent contents through pressure relief valves thereby increasing fire intensity and/or vapour concentration. |
| 3 | Vapours may travel to source of ignition and flash back.                                                                                |
| 4 | Liquid and vapour are flammable.                                                                                                        |
| 5 | Fire may produce irritating, poisonous or corrosive gases.                                                                              |
| 6 | Development of hazardous combustion gases or vapor possible in the event of fire.                                                       |
| 7 | May expansion or decompose explosively when heated or involved in fire.                                                                 |

### 5.3 Advice for firefighters

|   |                                                                                                                        |
|---|------------------------------------------------------------------------------------------------------------------------|
| 1 | As in any fire, wear self-contained breathing apparatus ( MSHA/NIOSH approved or equivalent) and full protective gear. |
| 2 | Fight fire from a safe distance, with adequate cover.                                                                  |
| 3 | Prevent fire extinguishing water from contaminating surface water or the ground water system.                          |

## 6 Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

|   |                                                                                                                                                            |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Avoid breathing vapours and contacting with skin and eye.                                                                                                  |
| 2 | Beware of vapours accumulating to form explosive concentrations.                                                                                           |
| 3 | Vapours can accumulate in low areas.                                                                                                                       |
| 4 | Emergency personnel wear positive pressure self-contained breathing apparatus. Wear protective and anti-static clothing. Wear chemical impermeable gloves. |
| 5 | Fully encapsulating, vapor protective clothing should be worn for spills and leaks with no fire.                                                           |
| 6 | Do not touch or walk through spilled material.                                                                                                             |
| 7 | Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.                                                        |
| 8 | Use personal protective equipment, do not breathe gas/mist/vapour/spray.                                                                                   |
| 9 | Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static                                                    |

|    |                                                                                   |
|----|-----------------------------------------------------------------------------------|
|    | discharges.                                                                       |
| 10 | Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak. |

## 6.2 Environmental precautions

|   |                                                       |
|---|-------------------------------------------------------|
| 1 | Prevent further leakage or spillage if safe to do so. |
| 2 | Discharge into the environment must be avoided.       |

## 6.3 Methods and materials for containment and cleaning up

|    |                                                                                                                                                                                                                                                            |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | It is recommended that emergency personnel wear positive pressure self-contained breathing apparatus and wear anti-static clothing.                                                                                                                        |
| 2  | In case of small amount of spillage, use clean non sparking tools to collect absorption materials.                                                                                                                                                         |
| 3  | In case of large amount of spillage, construct cofferdam or dig a hole to collect the spillage. Use foam cover to reduce evaporation. Water spray mist can reduce evaporation, but can not reduce the flammability of the leakage in the restricted space. |
| 4  | Collect absorbent material using a clean, non-sparking tool.                                                                                                                                                                                               |
| 5  | Cover with anti-solvent foam to reduce evaporation.                                                                                                                                                                                                        |
| 6  | Cover with DRY earth, DRY sand or other non-combustible material followed with plastic sheet to minimize spreading or contact with rain.                                                                                                                   |
| 7  | Water spray reduces evaporation but does not reduce the flammability of spills in confined spaces.                                                                                                                                                         |
| 8  | Do not touch or cross spills.                                                                                                                                                                                                                              |
| 9  | It is recommended that emergency personnel wear a self-contained breathing apparatus with positive pressure and wear anti-corrosion clothing.                                                                                                              |
| 10 | Transfer to a tank truck or special collector with a corrosion-resistant pump.                                                                                                                                                                             |
| 11 | Do not touch broken containers and spills before putting on appropriate protective clothing.                                                                                                                                                               |
| 12 | Cut off the source of the leak as much as possible.                                                                                                                                                                                                        |
| 13 | Keep leaks in a ventilated place.                                                                                                                                                                                                                          |
| 14 | Absorb spilled material in dry sand or inert absorbent. In case of large amount of spillage, contain a spill by bunding.                                                                                                                                   |
| 15 | Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.                                                                                                                                                                       |
| 16 | Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container.                                                                                                                                |
| 17 | Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.                                                                                                                                                                       |

## 6.4 Reference to other sections

|   |                                                                            |
|---|----------------------------------------------------------------------------|
| 1 | Personal Protective Equipment advice is contained in Section 8 of the SDS. |
| 2 | Disposal considerations advice is contained in Section 13 of the SDS.      |

# 7 Handling and storage

## 7.1 Precautions for safe handling

### ◆ Protective measures

|   |                                                   |
|---|---------------------------------------------------|
| 1 | Handling is performed in a well ventilated place. |
| 2 | Wear suitable protective equipment.               |
| 3 | Avoid contact with skin and eyes.                 |

### ◆ Measures to prevent fire

|   |                                                                                                           |
|---|-----------------------------------------------------------------------------------------------------------|
| 1 | Use only non-sparking tools.                                                                              |
| 2 | To prevent fire caused by electrostatic discharge steam, equipment on all metal parts should be grounded. |
| 3 | Use explosion proof equipment.                                                                            |

|                                                   |                                                       |
|---------------------------------------------------|-------------------------------------------------------|
| 4                                                 | Keep away from heat/sparks/open flames/ hot surfaces. |
| ◆ Measures to prevent aerosol and dust generation |                                                       |
| 1                                                 | Not applicable.                                       |
| ◆ Advice on general occupational hygiene          |                                                       |
| 1                                                 | Wash hands and face after using the substances.       |
| 2                                                 | Replace the contaminated clothing immediately.        |

## 7.2 Conditions for safe storage, including any incompatibilities

|   |                                                                  |
|---|------------------------------------------------------------------|
| 1 | Keep containers tightly closed.                                  |
| 2 | Keep containers in a dry, cool and well-ventilated place.        |
| 3 | Keep away from heat/sparks/open flames/hot surfaces.             |
| 4 | Store away from incompatible materials and foodstuff containers. |

## 7.3 Specific end use(s)

|   |                                                                                      |
|---|--------------------------------------------------------------------------------------|
| 1 | In addition to use mentioned in the Section 1.2, unforeseen other specific end uses. |
|---|--------------------------------------------------------------------------------------|

# 8 Exposure controls/personal protection

## 8.1 Control parameters

### ◆ Occupational exposure limit values

| Component       | Country/Region                                              | Limit value - Eight hours |                         | Limit value - Short term |                        |
|-----------------|-------------------------------------------------------------|---------------------------|-------------------------|--------------------------|------------------------|
|                 |                                                             | ppm                       | mg/m <sup>3</sup>       | ppm                      | mg/m <sup>3</sup>      |
| Sulphuric acid  | Japan - JSOH(2024–2025)                                     | -                         | -                       | -                        | -                      |
|                 | Permissible exposure standards for workers in the workplace | -                         | 1                       | -                        | 2                      |

◆ Predicted No Effect Concentration (PNEC)

| Component       | A                    | B                    | C                    | D                    | E                    | F                    | G                    | H                                |
|-----------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------------------|
| Sulphuric acid  | No hazard identified | No hazard identified | No hazard identified | No hazard identified | No hazard identified | No hazard identified | No hazard identified | No potential for bioaccumulation |
| Methylhydrazine | 200 ng/L             | 20 ng/L              | 100 µg/L             | No data available    | No data available    | No hazard identified | 80 ng/kg soil dw     | No potential for bioaccumulation |

**Note 1:**

A: Freshwater; B: Seawater; C: Sewage treatment plant; D: Sediment (freshwater); E: Sediment (seawater); F: Air; G: Soil; H: Secondary poisoning(Hazard for Predators).

**Note 2:**

The PNEC values of the remaining components not shown in the product are not available yet.

## 8.2 Exposure controls

### 8.2.1 Engineering controls

|   |                                                                                        |
|---|----------------------------------------------------------------------------------------|
| 1 | Ensure adequate ventilation, especially in confined areas.                             |
| 2 | Ensure that eyewash stations and safety showers are close to the workstation location. |
| 3 | Use explosion-proof electrical/ventilating/lighting/equipment.                         |
| 4 | Set up emergency exit and necessary risk-elimination area.                             |

### 8.2.2 Personal protection equipment

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General requirement      |      |
| Eye protection           | Must wear appropriate anti-corrosion goggles.                                                                                                                                                                                                                                                                                                                                                                                |
| Hand protection          | Must wear acid and alkali resistant chemical protective gloves.                                                                                                                                                                                                                                                                                                                                                              |
| Respiratory protection   | Must wear appropriate personal respiratory protective equipment.                                                                                                                                                                                                                                                                                                                                                             |
| Skin and body protection | Must wear anti static chemical protective clothing and anti static shoes.                                                                                                                                                                                                                                                                                                                                                    |

### 8.2.3 Environmental exposure controls

|                                 |                          |
|---------------------------------|--------------------------|
| Environmental exposure controls | No information available |
|---------------------------------|--------------------------|

## 9 Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

|                                             |                                                                             |
|---------------------------------------------|-----------------------------------------------------------------------------|
| Physical state                              | Clear, colorless liquid                                                     |
| Colour                                      | Clear, colorless liquid                                                     |
| Odor                                        | No information available                                                    |
| Odor threshold                              | No information available                                                    |
| pH                                          | 1 ( Sulphuric acid )                                                        |
| Melting point/freezing point(°C)            | 10 ( Sulphuric acid )                                                       |
| Initial boiling point and boiling range(°C) | 340 ( Decompose,Sulphuric acid )                                            |
| Flash point(Closed cup,°C)                  | -8.3 ( Methylhydrazine )                                                    |
| Evaporation rate                            | No information available                                                    |
| Flammability                                | No information available                                                    |
| Upper/lower explosive limits[%(v/v)]        | Upper limit : 97 ( Methylhydrazine ); Lower limit : 2.5 ( Methylhydrazine ) |
| Vapor pressure                              | 0.13kPa ( 146°C ,Sulphuric acid )                                           |
| Vapor density(Air = 1)                      | 3.4 ( Sulphuric acid )                                                      |
| Relative density(Water=1)                   | 1.6~1.84 ( 15°C,Sulphuric acid )                                            |
| Solubility                                  | Miscible with water ( Sulphuric acid )                                      |
| n-octanol/water partition coefficient       | -1.05 ( Methylhydrazine )                                                   |
| Auto-ignition temperature(°C)               | 196 ( Methylhydrazine )                                                     |
| Decomposition temperature(°C)               | 340 ( Sulphuric acid )                                                      |
| Kinematic viscosity                         | No information available                                                    |

## 10 Stability and reactivity

### Stability and reactivity

|                                         |                                                                                                                                                                                                                                              |
|-----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.1 Reactivity                         | Contact with incompatible substances can cause decomposition or other chemical reactions.                                                                                                                                                    |
| 10.2 Chemical stability                 | Stable under proper operation and storage conditions.                                                                                                                                                                                        |
| 10.3 Possibility of hazardous reactions | In contact with active metals (alkali metals, Na, Ca etc.) causes a reaction and release hydrogen. In contact with oxidants, anhydrides, metals, metal oxides / KMnO4 metal salts, nitro-compounds may cause a fire or explosion.            |
| 10.4 Conditions to avoid                | Incompatible materials, heat, flame and spark.                                                                                                                                                                                               |
| 10.5 Incompatible materials             | Alkali, sodium, calcium, and other active metal, halogen, metal oxide, nonmetal oxide, acyl halide and metal phosphide. Oxidants, halogen, anhydrides, acids, metals, metal oxides, potassium permanganate, nitro-compounds and metal salts. |
| 10.6 Hazardous decomposition products   | Under normal conditions of storage and use, hazardous decomposition products should not be produced.                                                                                                                                         |

## 11 Toxicological information

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008 with amendment 2023/707

| Methylhydrazine in water      |                                                                  |
|-------------------------------|------------------------------------------------------------------|
| Skin corrosion/irritation     | Causes severe skin burns and eye damage(Category 1)              |
| Serious eye damage/irritation | Causes serious eye damage(Category 1)                            |
| Skin sensitization            | Based on available data, the classification criteria are not met |
| Respiratory sensitization     | Based on available data, the classification criteria are not met |
| Reproductive toxicity         | Based on available data, the classification criteria are not met |
| STOT-single exposure          | Based on available data, the classification criteria are not met |
| STOT-repeated exposure        | Based on available data, the classification criteria are not met |
| Aspiration hazard             | Based on available data, the classification criteria are not met |
| Germ cell mutagenicity        | Based on available data, the classification criteria are not met |

### Acute toxicity

| Component       | LD <sub>50</sub> (oral) | LD <sub>50</sub> (dermal) | LC <sub>50</sub> (inhalation,4h) |
|-----------------|-------------------------|---------------------------|----------------------------------|
| Methylhydrazine | 32mg/kg(Rat)            | 95mg/kg(Rabbit)           | 0.064mg/L(Rat)                   |
| Sulphuric acid  | 2140mg/kg(Rat)          | No information available  | No information available         |

### Carcinogenicity

| Component       | List of carcinogens by the IARC Monographs | Report on Carcinogens by NTP |
|-----------------|--------------------------------------------|------------------------------|
| Water           | Not Listed                                 | Not Listed                   |
| Sulphuric acid  | Category 1(Remark 1)                       | Category K                   |
| Methylhydrazine | Not Listed                                 | Not Listed                   |

Remark 1: see Acid mists

## 11.2 Information on other hazards

### 11.2.1 Endocrine disrupting properties

| Component       | Endocrine disrupting properties |
|-----------------|---------------------------------|
| Water           | No information available        |
| Sulphuric acid  | No information available        |
| Methylhydrazine | No information available        |

### 11.2.2 Other Information

|                   |                  |
|-------------------|------------------|
| Other Information | See Section 11.1 |
|-------------------|------------------|

## 12 Ecological information

### 12.1 Toxicity

#### Acute aquatic toxicity

| Component       | Fish                                    | Crustaceans                                    | Algae or other aquatic plants             |
|-----------------|-----------------------------------------|------------------------------------------------|-------------------------------------------|
| Methylhydrazine | LC <sub>50</sub> : 0.38mg/L (96h)(Fish) | EC <sub>50</sub> : 0.95mg/L (48h)(Crustaceans) | ErC <sub>50</sub> : 0.28mg/L (72h)(Algae) |
| Sulphuric acid  | LC <sub>50</sub> : 16mg/L (96h)(Fish)   | No information available                       | No information available                  |

#### Chronic aquatic toxicity

| Component       | Fish                     | Crustaceans              | Algae or other aquatic plants |
|-----------------|--------------------------|--------------------------|-------------------------------|
| Methylhydrazine | No information available | No information available | NOEC : 0.042mg/L(Algae)       |

### 12.2 Persistence and degradability

| Component      | Persistence (water/soil) | Persistence (air) |
|----------------|--------------------------|-------------------|
| Sulphuric acid | Low                      | Low               |

### 12.3 Bioaccumulative potential

| Component      | Bioaccumulative potential | Comments      |
|----------------|---------------------------|---------------|
| Sulphuric acid | Low                       | Log Kow=-1.38 |

### 12.4 Mobility in soil

| Component       | log Koc | Remark     |
|-----------------|---------|------------|
| Sulphuric acid  | 0.00    | 20 °C      |
| Methylhydrazine | 1.124   | MCI method |

### 12.5 Results of PBT and vPvB assessment

| Component      | Results of PBT and vPvB assessment [according to (EC) No 1907/2006] |
|----------------|---------------------------------------------------------------------|
| Water          | Insufficient information, temporarily unable to evaluate            |
| Sulphuric acid | Not PBT/vPvB                                                        |

|                 |              |
|-----------------|--------------|
| Methylhydrazine | Not PBT/vPvB |
|-----------------|--------------|

## 12.6 Endocrine disrupting properties

| Component       | Endocrine disrupting properties |
|-----------------|---------------------------------|
| Water           | No information available        |
| Sulphuric acid  | No information available        |
| Methylhydrazine | No information available        |

## 12.7 Other adverse effects

|  |                          |
|--|--------------------------|
|  | No information available |
|--|--------------------------|

## 13 Disposal considerations

### 13.1 Waste treatment methods

|                          |                                                                                                                                                        |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste chemicals          | Before disposal should refer to the relevant national and local laws and regulation. Recommend the use of incineration disposal.                       |
| Contaminated packaging   | Containers may still present chemical hazard when empty. Keep away from hot and ignition source of fire. Return to supplier for recycling if possible. |
| Disposal recommendations | Refer to section waste chemicals and contaminated packaging.                                                                                           |

## 14 Transport information

### Label and Mark

|                    |                                                                                                                                                                         |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Transporting Label |   |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### IMDG-CODE

|                                        |                                     |
|----------------------------------------|-------------------------------------|
| 14.1 UN number                         | 2924                                |
| 14.2 UN proper shipping name           | FLAMMABLE LIQUID, CORROSIVE, N.O.S. |
| 14.3 Transport hazard class            | 3+8                                 |
| 14.4 Packing group                     | II                                  |
| 14.5 Environmental hazards (Yes or no) | No                                  |

### IATA-DGR

|                                        |                                     |
|----------------------------------------|-------------------------------------|
| 14.1 UN number                         | 2924                                |
| 14.2 UN proper shipping name           | FLAMMABLE LIQUID, CORROSIVE, N.O.S. |
| 14.3 Transport hazard class            | 3+8                                 |
| 14.4 Packing group                     | II                                  |
| 14.5 Environmental hazards (Yes or no) | No                                  |

### UN-ADR

|                              |                                     |
|------------------------------|-------------------------------------|
| 14.1 UN number               | 2924                                |
| 14.2 UN proper shipping name | FLAMMABLE LIQUID, CORROSIVE, N.O.S. |
| 14.3 Transport hazard class  | 3+8                                 |

|                                                   |           |
|---------------------------------------------------|-----------|
| <b>14.4 Packing group</b>                         | <b>II</b> |
| <b>14.5 Environmental hazards<br/>(Yes or no)</b> | No        |

### Special precautions for user

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Shipment of the goods vehicle exhaust pipe must be equipped with fire retardant devices, prohibit using mechanical equipment and tools of which easy to produce sparks. Transit should be anti-exposure, anti-rain, anti-high temperature.</p> <p>Transportation used tank (tank) cars should be grounded chain, tank can be installed to reduce the partition hole static electricity shocks. Strictly prohibited shipping or transportation with oxidants, acids, food and food additives etc. When bulk transport, Prohibit the use of cement or wooden boats. Transport vehicles should be equipped with the appropriate variety and quantity of fire equipment and emergency equipment leakage during transport. Before transport, should be preceded by checking whether container integrity, sealing. The transport unit must be placarded and marked in accordance with relevant transporting requirements.</p> |

### List of Chemical Substances under International Conventions

| Component       | A | B | C |
|-----------------|---|---|---|
| Water           | × | × | × |
| Sulphuric acid  | × | × | × |
| Methylhydrazine | × | × | × |

【A】 The Montreal Protocol on Substances that Deplete the Ozone Layer

【B】 Stockholm Convention on Persistent Organic Pollutants (POPs)

【C】 Rotterdam Convention on the prior informed consent procedure for certain hazardous chemicals and pesticides in international trade

### European chemical inventory

| Component       | A | B | C | D | E | F | G | H | I |
|-----------------|---|---|---|---|---|---|---|---|---|
| Water           | × | × | × | √ | × | × | × | × | × |
| Sulphuric acid  | × | × | × | √ | √ | × | × | × | × |
| Methylhydrazine | × | × | √ | √ | √ | × | × | × | × |

【A】 Candidate list of Substances of Very High Concern for authorization under EU REACH regulation

【B】 Substances requiring authorisation under EU REACH regulation

【C】 Substances restricted under EU REACH

【D】 Pre-registered substances under EU REACH

【E】 Registered substances under EU REACH

【F】 Substance Evaluation – CoRAP under EU REACH

【G】 List of priority substances under EU water policy ( Directive 2455/2001/EC )

【H】 Substances subject to POPs Regulation

【I】 Substances proposed as POPs

Note:

“√” Indicates that the substance included in the regulations.

“×” No data or not included in the regulations.

### German water hazard class(WGK)

| Component       | WGK   | Remark                                                                                                                                                                        |
|-----------------|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sulphuric acid  | WGK 1 | The regular and professional use of this substance for drinking water treatment, surface water remediation or waste water treatment is not restricted by this classification. |
| Methylhydrazine | WGK 3 |                                                                                                                                                                               |

【WGK 1】 slightly hazardous to water

【WGK 2】 obviously hazardous to water

【WGK 3】 highly hazardous to water

【nwg】 non-hazardous to water

【awg】 hazardous to water in general

### German technical instructions on air quality control(TA LUFT)

| Component       | TA LUFT                                                                                                                                                                                                                                                                               | Remark |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Methylhydrazine | Chapter 5.2.7.1.1 Carcinogenic Substances<br>The substance must be assigned to the class (I, II or III) whose substances have the nearest potency. We can not accomplish this evaluation due to insufficiency of data. Carcinogenic substances not mentioned by name and for which no |        |

|  |                                                                                               |  |
|--|-----------------------------------------------------------------------------------------------|--|
|  | information on potency is available should be assigned to Class I as a precautionary measure. |  |
